

## Colocation Campus – Dublin

Colocation brings connectivity providers, cloud providers, service providers, vendors and enterprises together in a neutral space.

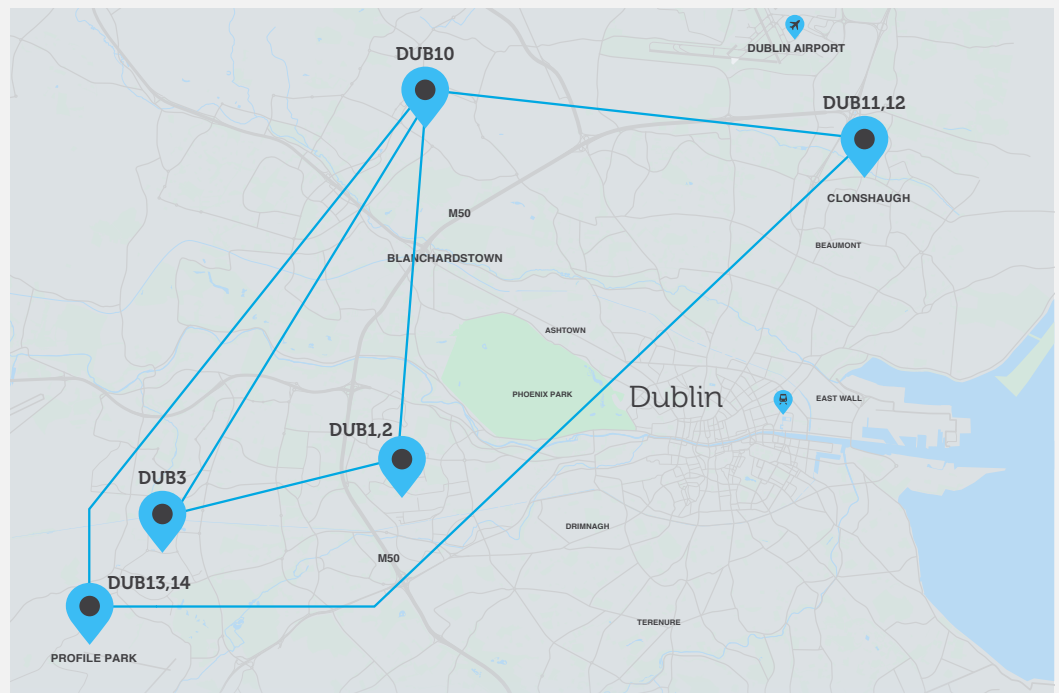

Interxion provides the connectivity to support multi and hybrid cloud strategies.

## Our Dublin Colocation Campus

### Distance between locations

- Dub 2 to Dub 10 = 9.1km
- Dub 2 to Dub 3 = 5.4km
- Dub 3 to Dub 10 = 10.4km
- Dub 10 to Dub 14 = 18km
- Dub 10 to Dub 11 = 17km
- Dub 11 to Dub 14 = 30km

### Access to all public Cloud Providers

We provide direct and secure access to all public cloud providers – improving flexibility and reducing costs.

### Higher levels of bandwidth

With access to 45+ carriers we give companies access to higher levels of bandwidth compared to a normal office server room at a much lower cost.

### Higher reliability

We offer greater protection from power outages because of our numerous data backups in place and we provide low-latency networking options.

### Improved physical protection

We apply more stringent measures for securing data such as CCTV monitoring, mantraps, fire detection, suppression systems, and private suites.

### Sustainability

We operate to the highest energy efficiency standards and 100% of purchased energy is green.

### Hands & Eyes

We offer 24/7 installation and maintenance.

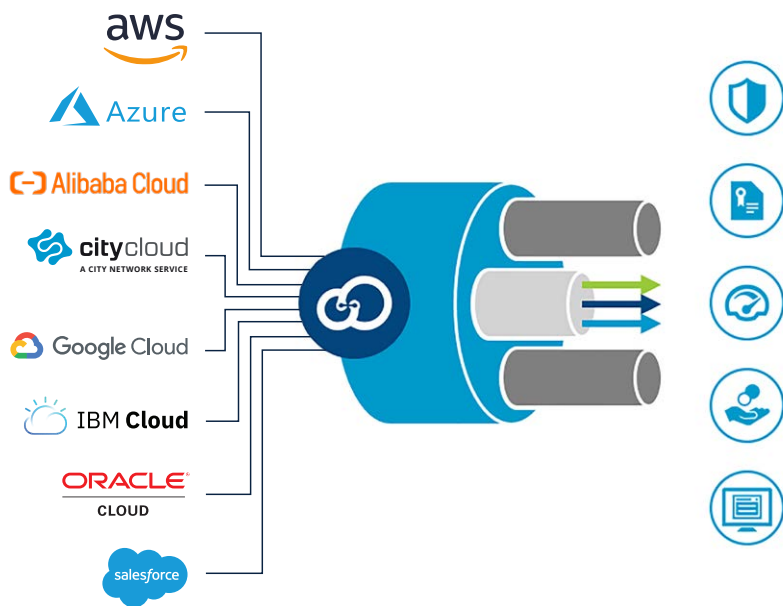

### Cloud Briefing Suite

We offer an executive cloud briefing suite to discuss and analyse your strategic business objectives.

## Cloud Connect

Cloud Connect is a pan-European cloud access service, multi-cloud interconnectivity platform providing private access to Cloud Service Providers, through a single interface. This enables customers to build scalable hybrid IT solutions in a cost-effective way.

### Benefits

- **It's Secure** – Avoid the public Internet to connect securely to cloud and other service providers.
- **It's Reliable** – Ensure predictable performance backed by a 99.999% availability SLA.
- **It's Fast** – Reduce the number of hops to the cloud - high bandwidth, low latency.
- **It's Cost-effective** – Reduce costs with a single connection to multiple cloud platforms.
- **It's Easy** – Real-time automated ordering through Interxion's Customer Portal.

At Interxion we understand that every business is different.

We work with every customer to find solutions to meet their specific IT needs and to ensure that every application and service can be deployed and managed where it makes the most sense.

## How we Support Your Business

### USE CASE

# 1

### Save cost with data centre consolidation

Move workloads into the cloud. Consolidate and collocate remaining workloads to save costs and de-risk migration.

### USE CASE

# 2

### Distribute infrastructure with global backbone

Align business and IT strategy. Determine the most beneficial locations for connecting infrastructure.

### USE CASE

# 3

### Distribute data & applications with hybrid cloud

Optimise cloud connections for supporting critical workloads. Retain flexibility with a global multi-cloud platform.

### USE CASE

# 4

### Harness data innovation with HPC and enterprise AI

From edge to core across your Enterprise IT, reduce latency of AI inference and embrace high density GPU accelerated compute for AI training.

## Avelacom – Case Study

As Dublin's financial industry continues to thrive with the growth of fintech, banking and cryptocurrencies, Avelacom has launched its latest point of presence (PoP) in Dublin to meet the growing demand in the Irish market. This growth is driven by new cryptocurrency trading platforms based in Dublin, international financial services expanding their services in Ireland and Ireland's growing economy. To support this expansion Avelacom is working with Interxion to extend its low latency network to Dublin.

In choosing a partner to expand within Dublin, Interxion's international and local experience in the financial industry was a key deciding factor. The communities of interest which Interxion has built-in Dublin and across Europe, along with Avelacom's established partnership with Interxion in London and Marseille contributed to Avelacom's choice.

"We chose Interxion in Dublin just because Interxion team can provide us with first class services and access to this vast financial eco-system including all major market players like market data vendors and brokerage firms using just one cross connect. It's really important to have safe and secure network in terms of our data centre. Our customers are trading firms and banks so if they are going to trust us, we need to trust our providers and one that we feel we can trust is Interxion."

### About Interxion: A Digital Realty Company

Interxion: A Digital Realty Company, is a leading provider of carrier- and cloud-neutral data centre services across EMEA.

With more than 700 connectivity providers in over 100 data centres across 13 European countries, Interxion provides communities of connectivity, cloud and content hubs.

As part of Digital Realty, customers now have access to 49 metros across six continents.
